Profile

Highly motivated software engineer seeking to leverage my technical expertise and passion for innovation to drive organizational growth and success.

Work Experience

Senior Software Engineer — MIT, Manipal

September 2022 -
September 2023

Spearheaded the development of machine translation projects, including Discourse Integrated Dravidian Language to Dravidian Language and Indian Language to Indian Language, funded by MeitY, utilizing my expertise in software engineering to drive project success.

Assistant Professor, Department of Computer Applications — Dr. B. B. Hegde First Grade College, Kundapura

September 2023 - Present

Currently serving as an Assistant Professor, leveraging my technical expertise to educate and mentor students in computer applications, and contributing to the development of the department's curriculum and academic programs.

Education

Manipal Institute of Technology, Manipal

2022

M.Tech, Computer Science & Engineering — CGPA/Grade: 9.05 (CGPA)

Nitte Mahalinga Adyanthaya Memorial Institute of Technology, Nitte

2020

B.E, Information Science & Engineering — CGPA/Grade: 9.31(CGPA)

Poorna Prajna Pre-University College, Udupi

2016

Pre-University — CGPA/Grade: 89.17%

Nirmala English Medium School, Brahmapur

2014

S.S.L.C — CGPA/Grade: 92.32%

Skills

MySQL, MSSQL, Mongo-DB, Firebase, Windows XP, Windows 7, Windows 8, Windows 10, Linux Ubuntu, Cloud computing, DevOps, Cybersecurity

Projects

Dental Shading Detection

Developed a dental shading detection system utilizing image processing and machine learning algorithms to accurately identify tooth shades, demonstrating my ability to apply technical skills to real-world problems.

Whale Optimization Algorithm for allocating services to fog nodes

Investigated the application of the Whale Optimization Algorithm for efficient service allocation to fog nodes, taking into account computation power constraints, and explored the potential benefits of this approach in fog computing environments.

Prediction of execution time for different service modules of a microservice application

Conducted research on predicting execution times for microservice application modules using machine learning algorithms, analyzing the impact of various parameters on performance, and exploring the potential applications of this research in optimizing microservice architectures.

Certifications

Big Data Computing - SWAYAM — SWAYAM

Completed a comprehensive course covering big data technologies, data processing, and analytics tools.

Python for Data Science - SWAYAM — SWAYAM

Acquired proficiency in Python programming, including libraries such as Pandas, NumPy, and Matplotlib for data analysis and visualization.

Introduction to Quantum Computing - SWAYAM — SWAYAM

Explored the fundamentals of quantum computing, quantum algorithms, and their applications in computing and cryptography.

Hobbies & Interests

Teaching, Coding, Playing Badminton, Listening to Music

Achievements

- Cleared GATE CSE in 2020
- Active Member of CSI (2016 - 2020)
- Joint Secretary of IEI (Information Science and Engineering) (2017-18)
- Vice President of IEI (Information Science and Engineering) (2018-19)
- Core Member of DSC (Developer Student Club) (2018-2020)
- 1st place in coding event held at AJIET, Mangalore

Languages

English, Kannada, Hindi, Konkani

Internships

Research Internship — National Institute of Technology, Surathkal (NITK) (Surathkal)

Research in the area of Cloud and Fog Computing, involving technologies such as Google Cloud Platform, Virtual Machines, Containers, Raspberry Pis etc.

PERSONAL DETAILS

Date of Birth: 26-10-1998

Father's Name: M Rajesh Rao

Gender: Male

Nationality: Indian

Mother Tongue: Konkani
